Professional Summary

Computer Engineering undergraduate (2028) specializing in Agentic AI, LLM orchestration, and AI automation. Hands-on internship experience building multi-agent systems, n8n workflows, FastAPI services, and full-stack AI applications. Seeking AI engineering internships; open to remote and relocation opportunities.

Technical Skills

Agentic AI & LLMs: LangGraph, LangChain, n8n, Multi-Agent Systems, LLM Orchestration, RAG, Prompt Engineering, Ollama
AI/ML & NLP: PyTorch, Scikit-learn, Hugging Face, Sentence-BERT, pandas, NumPy
Programming & Backend: Python, JavaScript, SQL, FastAPI, Flask, REST APIs, Server-Sent Events
Frontend & Data: React, Next.js, PostgreSQL, Supabase, Pinecone, Git/GitHub, Playwright

Professional Experience

Surfboard Ventures *Jun 2026 – Present*

Developer Intern; previously AI Agents & Autonomous Systems Intern

- Develop EdQuest's AI-powered personalized learning engine using psychometric profiles, assessment scoring, content branching, and streaming course generation.
- Contribute to multi-tenant data architecture; built n8n automation and multi-agent founder orchestration projects, earning Best Project recognition in both internship weeks.

Hexamad Digital *Mar 2026 – Jun 2026*

AI Systems & Automation Intern

- Developed an eight-agent n8n trading automation workflow integrating market data, sentiment analysis, risk controls, Dhan API, trailing stop-loss logic, and Telegram alerts.
- Gained hands-on experience in AI-agent development, prompt engineering, workflow orchestration, and API integration.

Selected Technical Projects

Axon | AI Agent Validation Middleware GitHub | Demo

- Engineered a fail-closed validation API with schema, GPT-4o-mini semantic, and policy checks; designed 11 n8n backend workflows with Next.js and PostgreSQL.

Maestro.ai | Multi-Agent Orchestration GitHub | Demo

- Built a six-agent LangGraph and FastAPI orchestration system using GPT-4o, SSE, Pinecone vector memory, and external APIs for startup planning.

North Star | Remote-Sensing AI Assistant GitHub | Video

- Developed a GeoChat-7B assistant with LangGraph and FastAPI for satellite visual Q&A, captioning, grounding, and agent routing; integrated quantized inference and tool interfaces.

IntelliTrail | ML Trading & Risk Automation GitHub

- Built Scikit-learn forecasting using SMA, RSI, and ATR indicators, adaptive trailing stop-loss logic, and React/FastAPI simulations.

Adhikaar-Setu | Scheme Assistance Automation GitHub | Video

- Built a Flask/React government-scheme matching platform with Playwright form automation and consent-based Twilio WhatsApp integration.

Education

Vidyavardhini's College of Engineering and Technology *2024 – 2028*

B.E. Computer Engineering **CGPA: 9.22/10**
First-Year Engineering Rank 1 (2024–25); FY CGPA: 9.48/10.

Publications

IEEE Conference Paper (2026): Data-Driven Insights in Comparative Literature: NLP and Machine Learning for Comparative Literary Studies
Book Chapter (2026): *Data Meets Drama*; Advanced Researches in Artificial Intelligence and Machine Learning, Volume 1; AkiNik Publications.
Creative Publication (2025): *Echoes of an Endless Sky*; Shattered Seasons: Speculative Stories of Climate Change.

Honors & Awards

2nd Place – All-India n8n Workflow Showcase (2026)
National AI Olympiad 2025: All-India Rank 364, Maharashtra Rank 60
Best Speaker – FaceOff 13, VCET (2026)
